

# Culturally-Sensitive Social Robotics for Africa

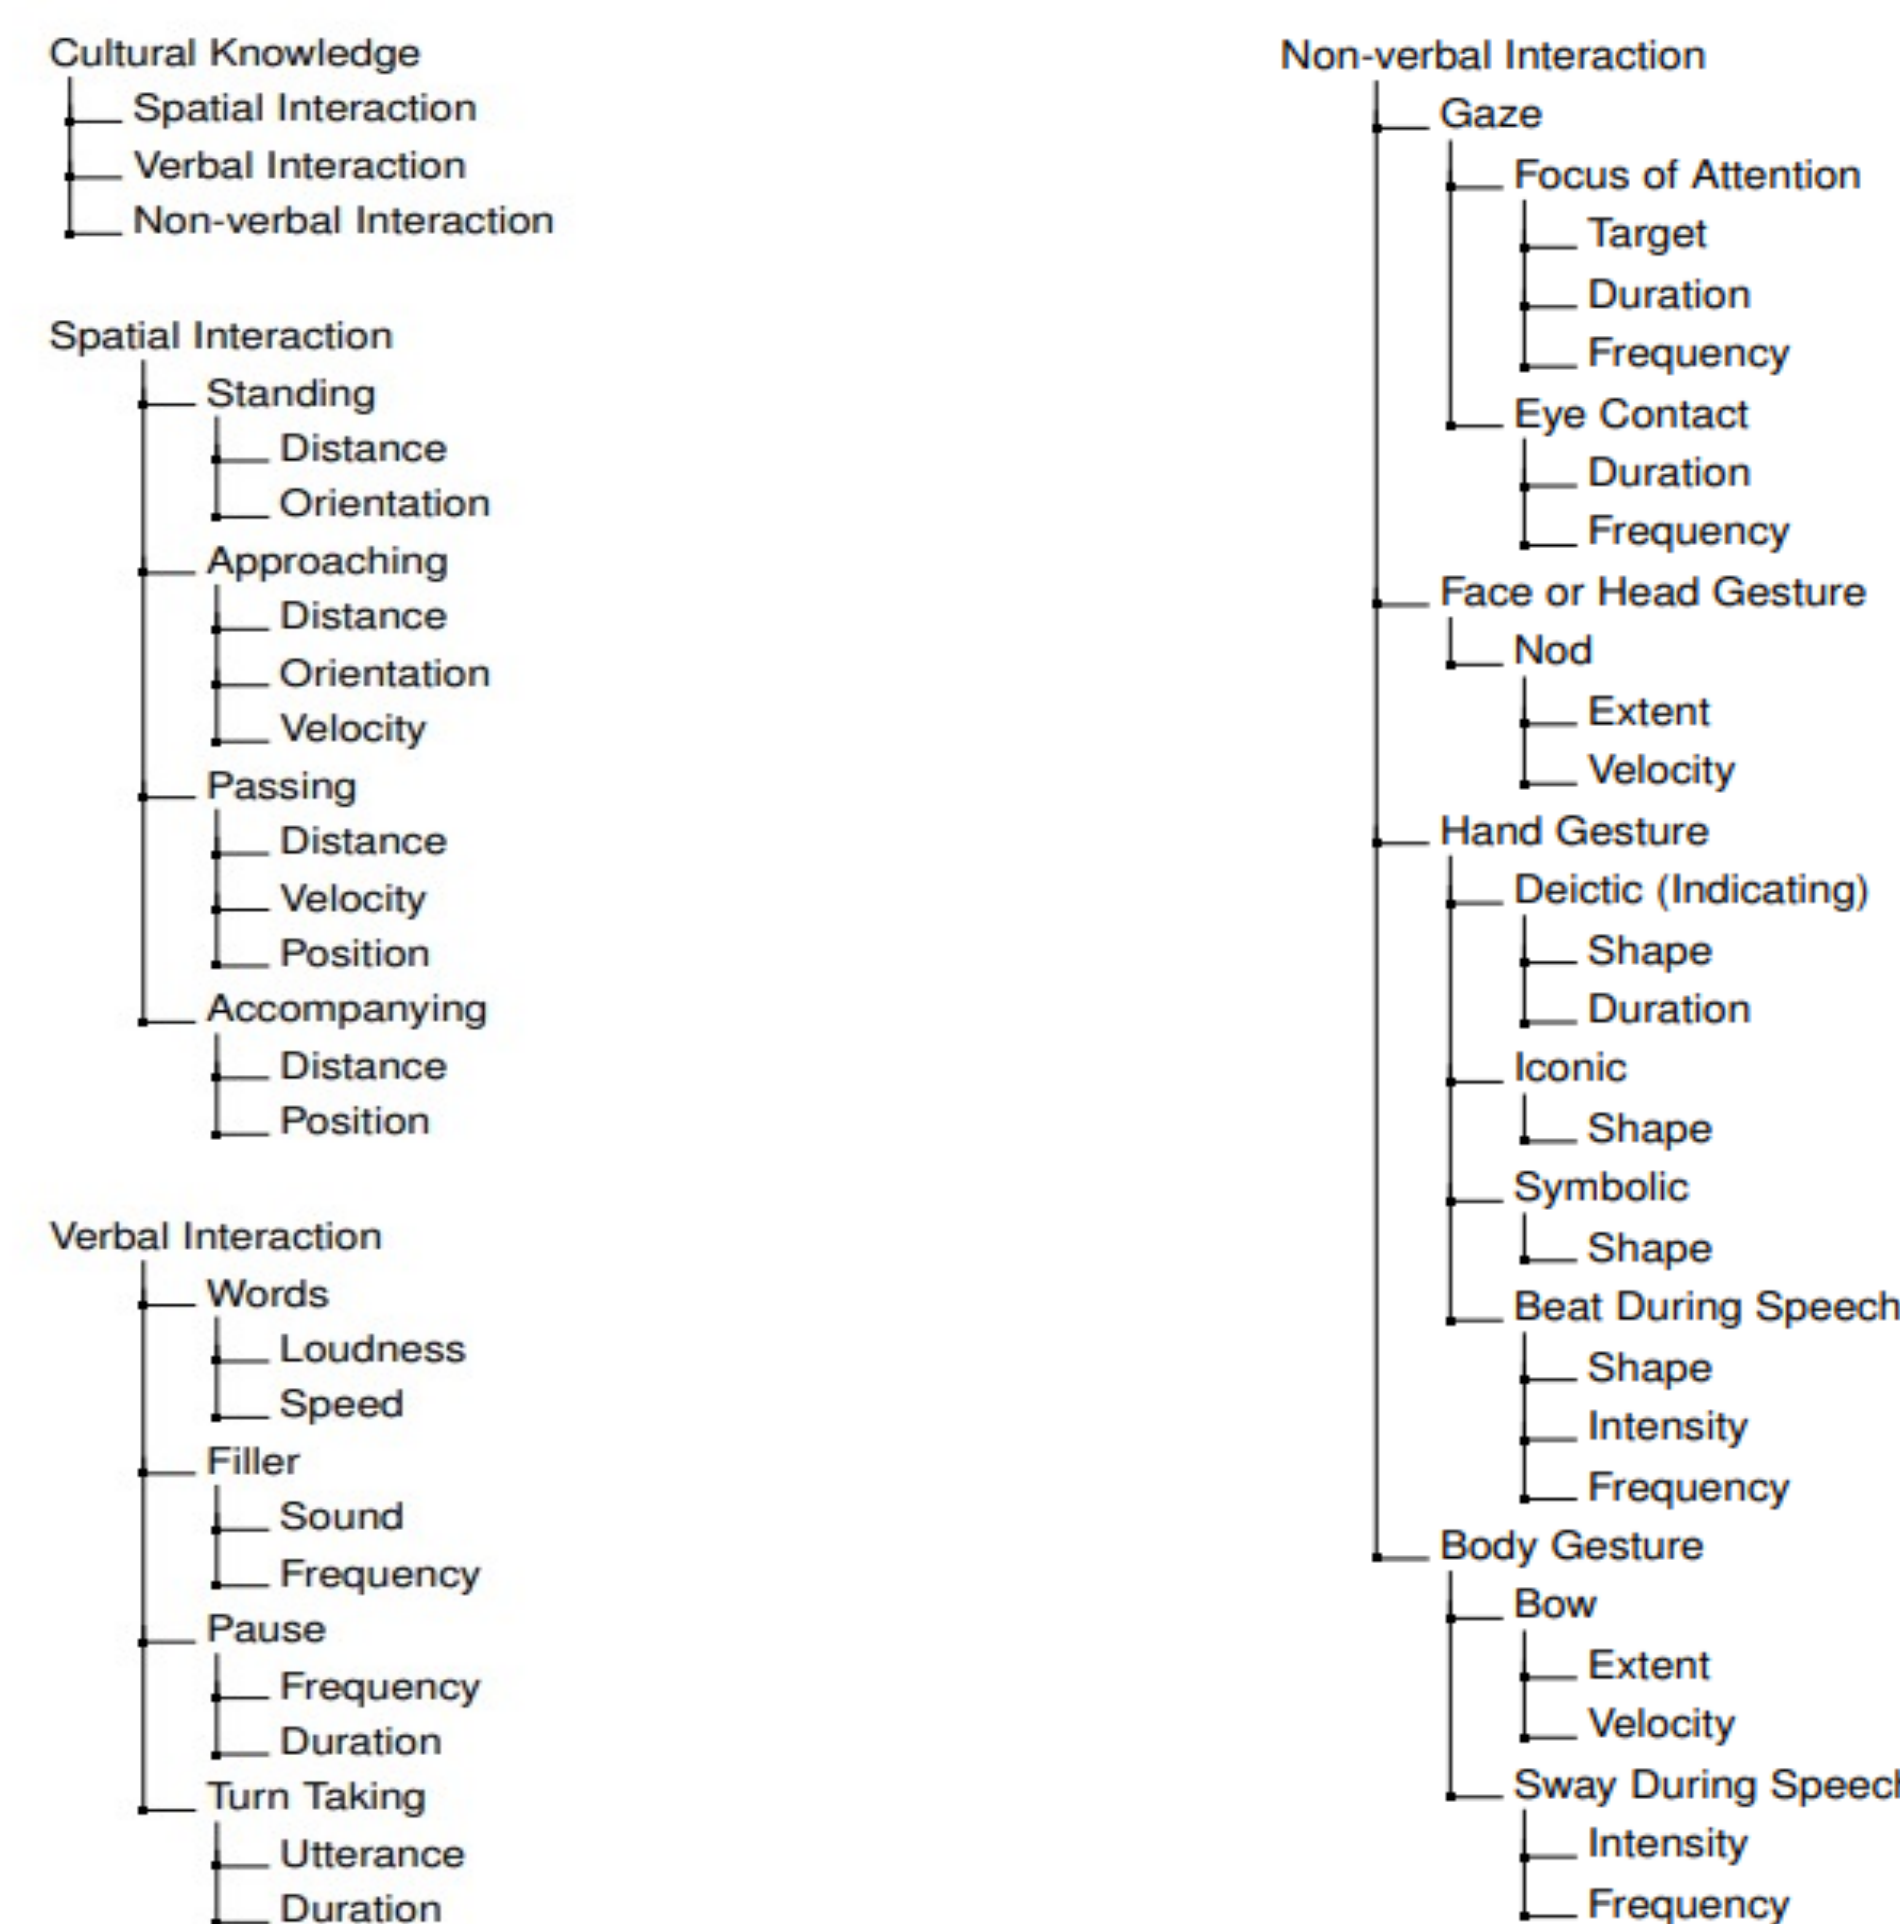

## Research Goals

The CSSR4Africa project is working equip social robots with the ability to interact sensitively and politely with people in Africa using spatial, non-verbal, and verbal modes of communication.

## Cultural Knowledge Ontology

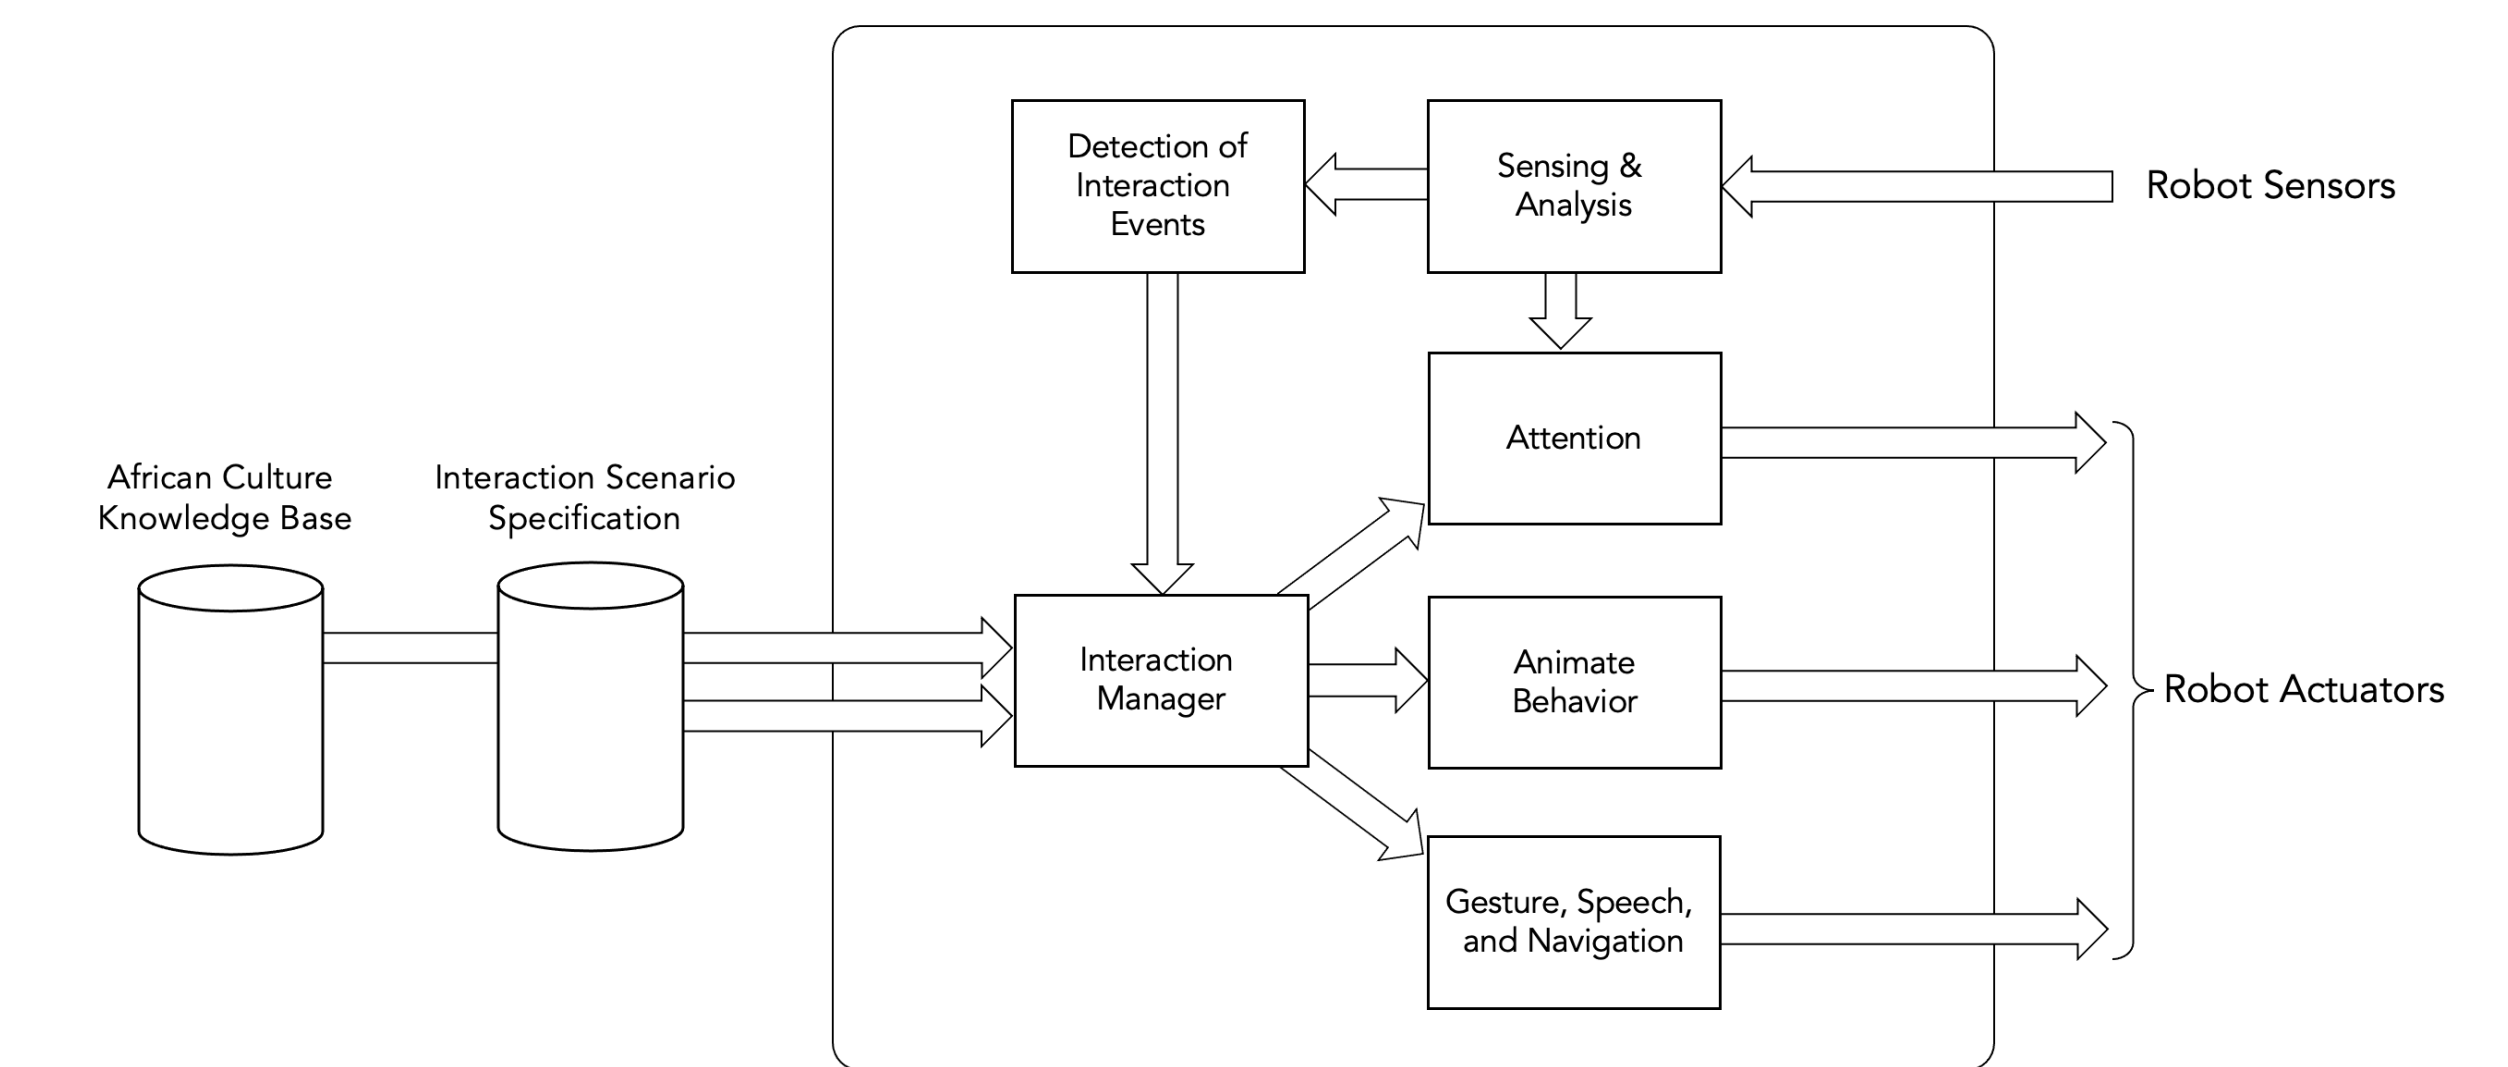

## The Pepper Social Robot

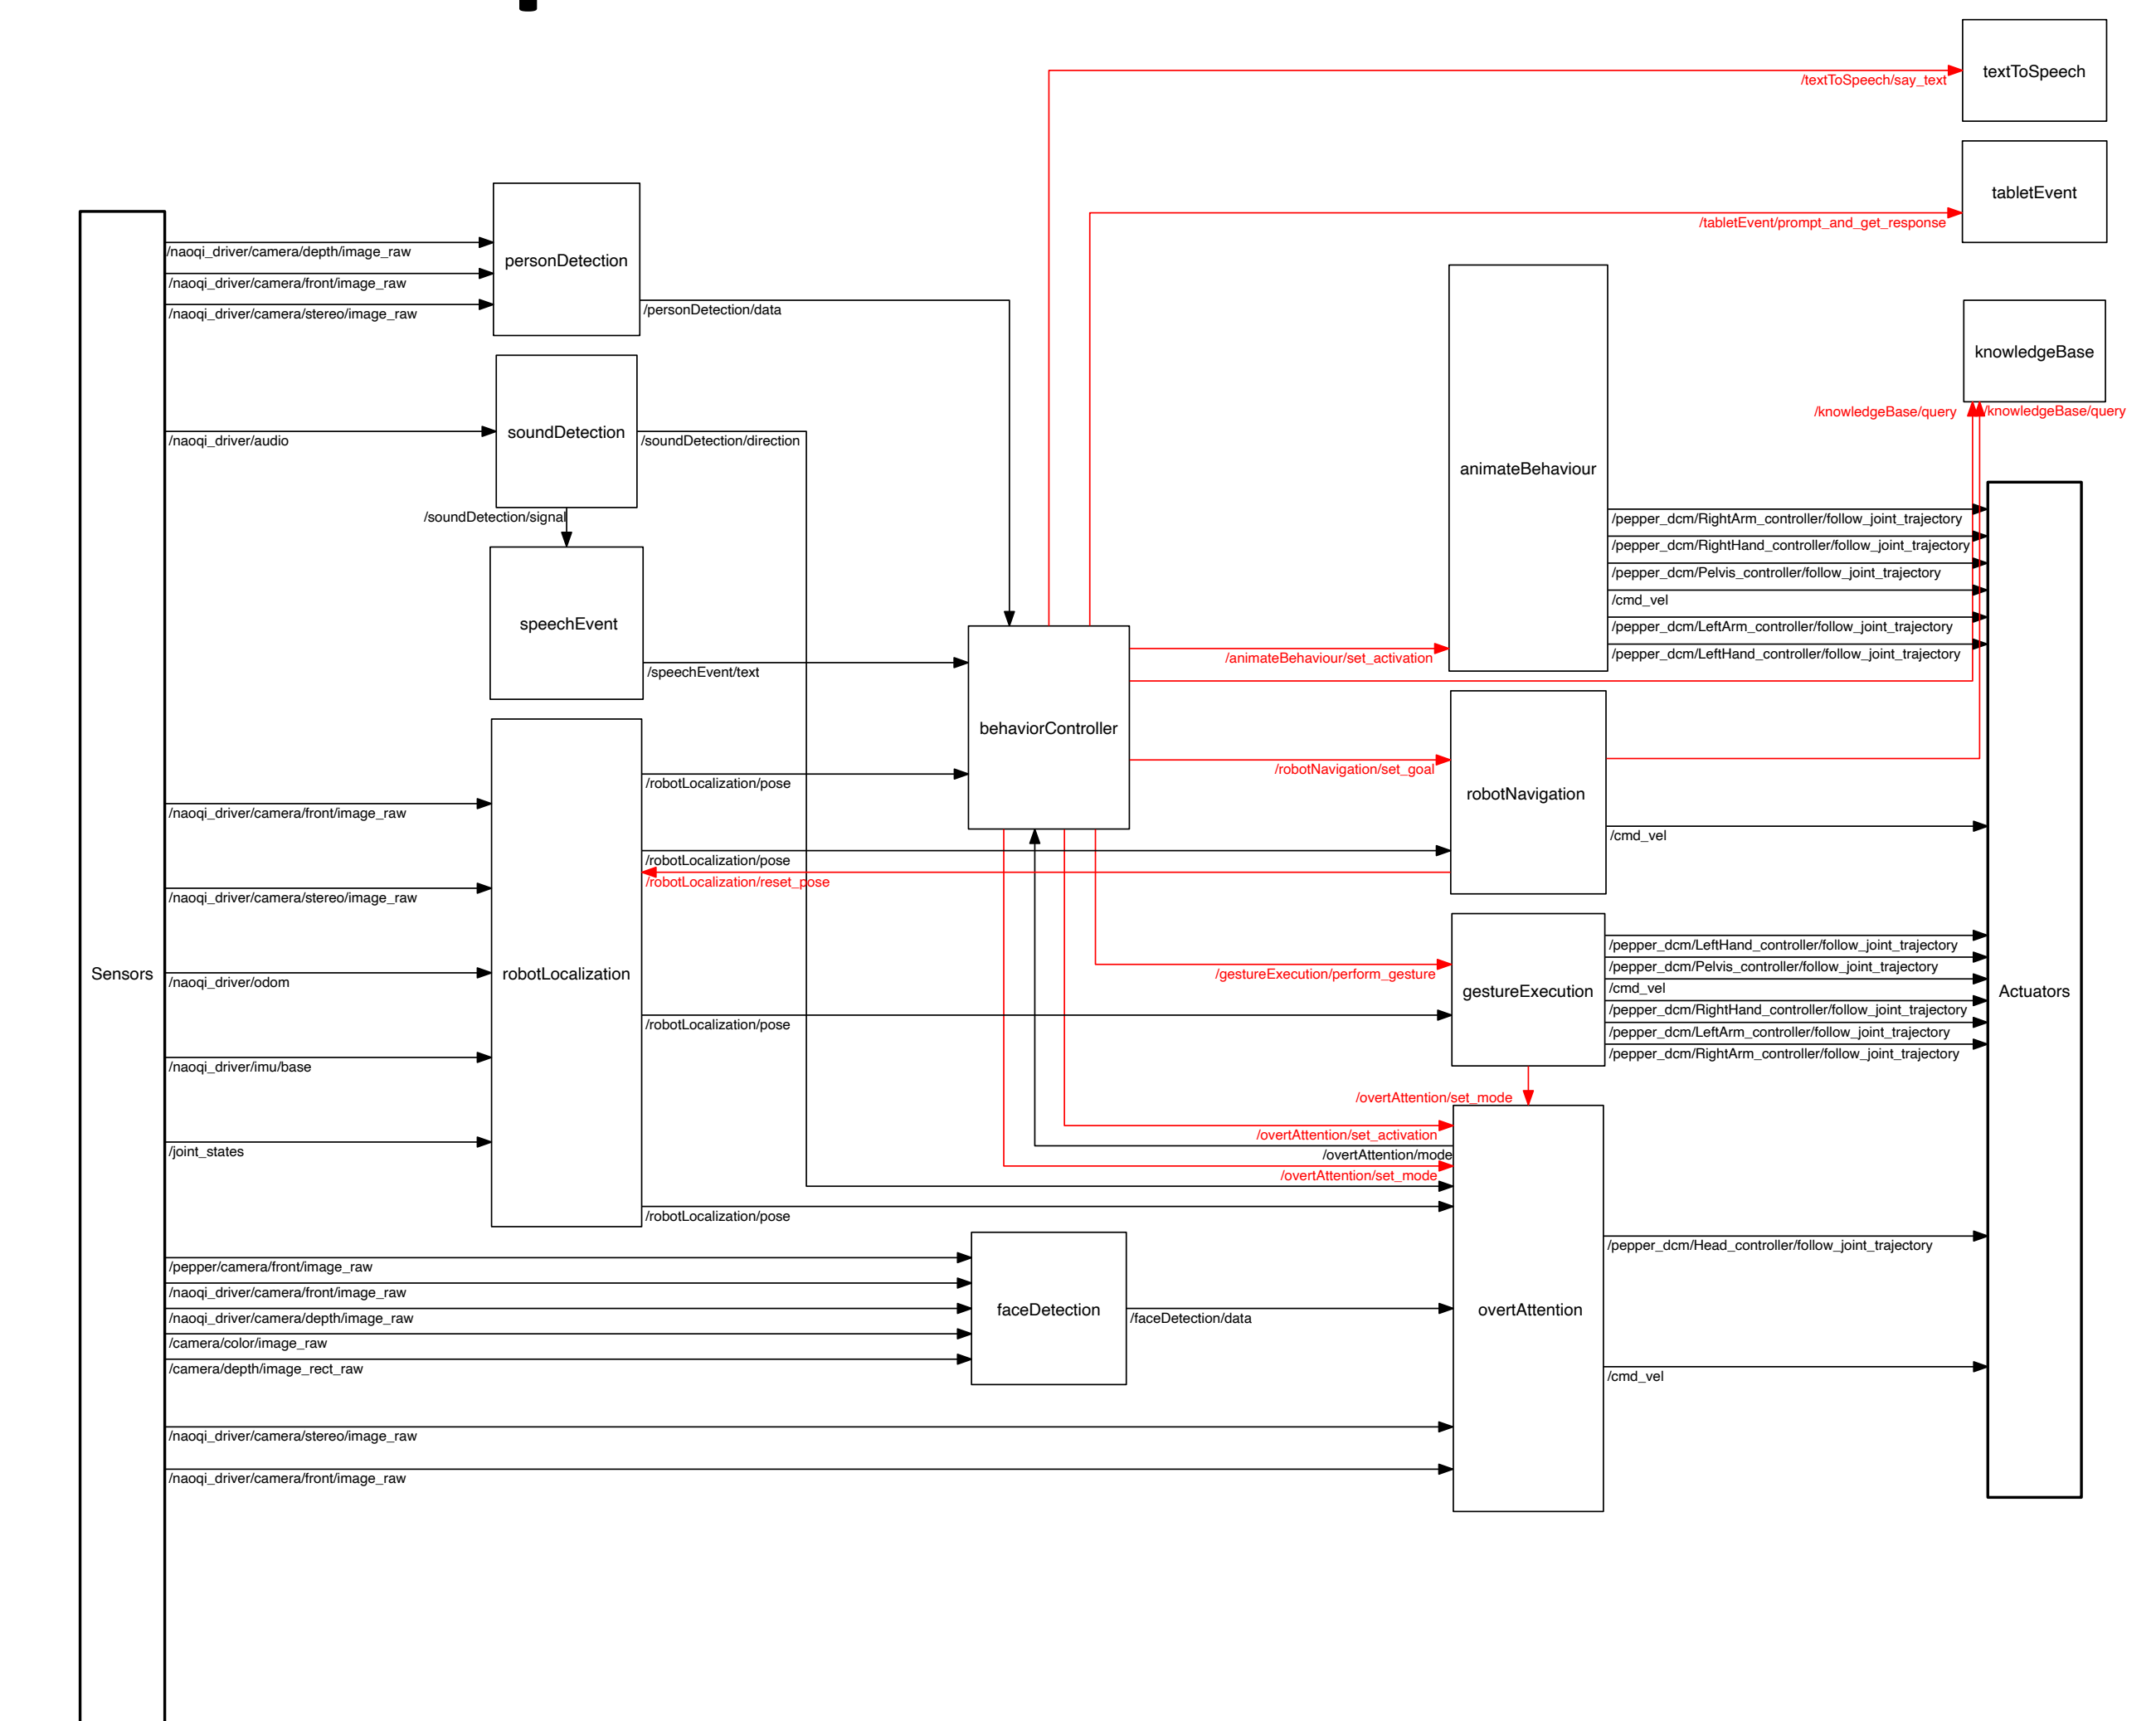

## Example Cultural Knowledge

No.	Socio-cultural Norm or Trait
1	All interactions should begin with a courteous greeting.
5	To show respect, one should bow slightly and lower gaze when greeting someone older.
8	One should use an open palm of the hand to point to people and objects.
10	One should not use the left hand to point to anything.
19	One should not make persistent eye contact with an older person.
21	To show respect, one should shake hands with the right hand and use the left arm to support the right forearm when doing so.
23	One should not walk between two or more people who are conversing; it is considered rude to do so.
25	Behaviours should focus on fostering social connections and relationships; they should not be purely functional.

## System Architecture

## ROS Implementation
